

## ShowPro Rings Announcer's App

The Announcers App allows the announcer to select a ring, a sub show if applicable, a day, and the class. Once the class is selected the list of entrants will be loaded. There is a check box that that can be checked for the announcers reference, it doesn't perform any action in ShowPro.

The Entries tab displays the entire list of entries for the show, equivalent to the Entries By Number report in ShowPro.

The Results tab shows the results for the selected class. The results will appear dynamically here for the class being judged as they are sent to the office and if a class has been placed previously those results, for all judges, will be reported here as well.

For Hunter Jumpers the Champ Sheet will be available if applicable, with this final piece the announcer should have everything needed to do the job.
